Official Grades of Sash, Doors and Blinds.

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association of the Northwest.

DOORS.

AAA. Oil Finish Doors.—Material for AAA. Oil Finish Doors must be Clear, no white sap admitted. Workmanship must be good.

AA. Oil Finish Doors.—Material for AA. Oil Finish Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of any one piece. Workmanship must be good.

A. Doors.—Material in A. Doors must be Clear, with the exception that water stains and small pin knots not exceeding one-fourth (¼) inch in diameter may be admitted. No piece to contain more than two (2) such defects and no door more than five (5) such defects on each side; white sap not considered a defect. Workmanship must be good.

B. Doors.—Material in B. Doors may contain knots not to exceed one (1) inch in diameter, and blue sap showing on both sides not to exceed fifty (50) per cent in any one piece of the door and gum spots showing on one (1) side of a piece only and other slight defects, shall not exceed ten (10) in number on each side and each white pine stile, bottom and lock rail must contain at least one (1) and not to exceed three (3) such defects; plugs admitted and not regarded as a defect. Slight defects in workmanship admitted.

C. Doors.—Material in C. Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and three-fourths (1¾) inches in diameter. Twenty (20) defects may be allowed on each side, also slight defects in workmanship. Each piece of white Pine in a No. C Door must contain a defect. Not more than six (6) defects allowed in any one piece.

D. Doors.—D Doors are regarded as a cull door and must contain large coarse knots and may contain rot, worm holes, shake and other serious defects.

A Standard Door may be through tennon, blind tennon or dowelled.

WINDOWS.

Check Rail Windows may contain two (2) knots three-eighths (⅜) inch in diameter or one red knot five-eighths (⅝) inch in diameter in each piece of a window. White sap and not over thirty-three and one-third (33 1-3) per cent blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

BLINDS.

No. 1. Outside Blinds must be made of Clear lumber, except that small, sound pin knots, water stain and white sap may be admitted. Workmanship must be good.

WOODS ADMISSIBLE.

Woods other than Michigan, Wisconsin and Minnesota White Pine admitted in Doors, Blinds and Windows, except in Oil Finish Goods.

DIRECTIONS FOR ORDERING.

Valuable time will be saved us in serving our patrons by their close observance of the following directions:

Unless otherwise specified, or covered by standing instructions to the contrary, we will understand all orders as calling for **REGULAR WESTERN STYLES OF GOODS,** as described in this Catalogue.

The universal rule in ordering mill work is to give the width first and then the height.

WINDOWS AND SASH.

A—The term Sash indicates a single piece.

B—The term Window means two pieces, an upper and a lower Sash, made with either plain or check rail.

C—In ordering regular sizes of Sash or Windows, give size of glass and number of lights and thickness; if a Window, whether check or plain rail; state whether open or glazed, and if glazed, whether with single or double strength glass.

D—In ordering odd sizes, give the size of opening to be filled and describe as above.

E—When measurements are given in inches, it usually indicates the glass size, and we will so understand it; when given in feet and inches the outside measure or opening is understood.

F—In ordering Segment or Circle-head Sash and Windows, give the number of style desired (see page 9) and the radius of Circle or Segment. If no number or proper description is given in ordering, we will substitute for Circle Head Style No. 2, and for Segment Head Style No. 4, using our regular radius, which is the width of the Sash for Segment Heads and one-half the width of Sash for Circle Heads.

DOORS.

G—In ordering always give width, height, thickness, number of panels and quality. If full instructions are not given, to save time in shipment, we assume that our Standard Door, 1¾ inch, Four Panel O. G. No. 1 quality is desired, and will fill order accordingly.

H—If other than Four Panel O. G. Doors are required, for panel Doors give number and arrangement of panels and style of Sticking; for Sash Doors give number of style desired; indicate whether open or glazed, and if glazed, style of glazing.

I—Where Moulded Doors are required state whether flush or raised mould is desired, and if to be moulded on one or two sides.

BLINDS.

In Ordering, Specify Whether Outside (O. S.) or Inside (I. S.) Blinds are Wanted.

J—OUTSIDE BLINDS. In ordering Outside Blinds, if regular, give size of glass and number of lights in window for which they are intended, and size of opening to be filled, if odd; give thickness and state if rolling slats (R. S.), stationary slats (S. S.), or half rolling and half stationary slats (½ R. S., ½ S. S.) are required. If other than these styles are required, order must so state.

K—The regular opening for Outside Blinds is one (1) inch longer than Check Rail Windows of corresponding glass size. Where Blinds of extra length for brick buildings are desired, order must so state, and Blinds will then be made two (2) inches longer than sash opening.

L—Our Standard Blinds are 1⅛ inch thick, full rolling slats made for regular openings, as above described. When not otherwise specified we assume this to be the style desired, and fill orders accordingly.

M—INSIDE BLINDS. In ordering it is best to give exact outside measure of opening to be filled. Give thickness, number of folds and state if all panels, all slats or half panel and half slats, giving sketch of any unusual arrangement of panels.

N—If Blinds are to be cut, state how many times and give distance from top of window to center of meeting rail.

O—If Blinds are to fold into pockets, give size of pockets.

P—State quality, whether No 1, for paint or oil finish.

Q—When description of window only is given, as in ordering O. S. Blinds, we furnish our standard measurement of Inside Blinds, which is the same as the check rail window opening, 1⅛ inch thick, four fold where practicable, made to cut once at check rail.

MOULDINGS.

R—In ordering, give numbers as shown in this catalogue and name kind of wood. If other styles than are shown herein are required, furnish detail or sketch with correct measurements.

S—Unless otherwise instructed, we will fill orders with our Standard Mouldings, No. 1 Paint Quality, in miscellaneous long lengths, 10, 12, 14 and 16 feet long.

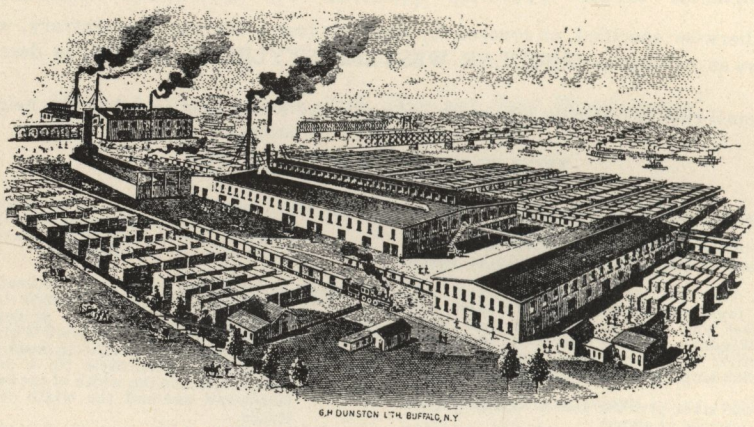

FRAMES.

T—In ordering, state whether for Outside or Inside Frames.

U—For Window Frames give size, thickness and full description of window, stating whether for frame, brick or veneer buildings. If for frame or brick veneer building, give width of studding. If for brick building give thickness of wall. State if frames are desired with or without pulleys.

V—For Outside Door Frames give size and thickness of Door, and state whether frames are required with stops or with rabbeted jambs, and if sill is to be Pine or Oak. If for frame building give width of studding; if for brick building, give thickness of wall.

W—For Inside Door Frames give size and thickness of Door and width and thickness of jambs; state whether stops or rabbeted jambs are required, and advise if thresholds are desired.

CIRCLE and SEGMENT TOP WINDOWS.

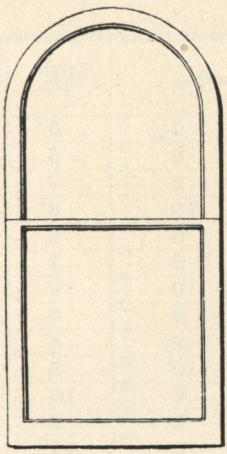

Fig. 1

Circle inside and outside.

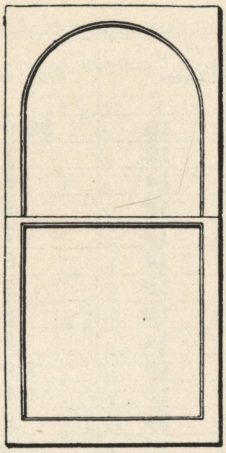

Fig. 2

Circle outside, Square inside.

In ordering Segment or Circle-head Sash and Windows, give the number of style desired and the radius of Circle or Segment. If no number or proper description is given in ordering, we will substitute for Circle Head Style No. 2, and for Segment Head Style No. 4, using our regular radius, which is the width of the Sash for Segment Heads and one-half the width of Sash for Circle Heads.

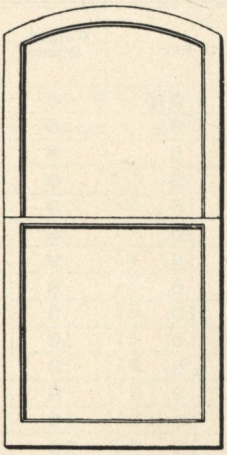

Fig. 3

Segment inside and outside.

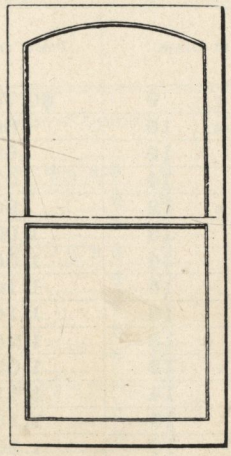

Fig. 4

Segment outside, Square inside.

The above windows can be filled with any number of lights required. Always give radius of segment, otherwise they will be made regular radius, which is width of window.

For prices see sash extras, pages 44 to 47.

For Sash extras see pages 44 to 47.

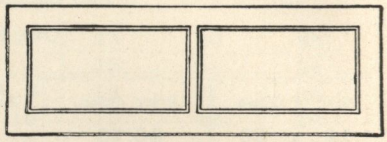

BENT OR SWELL FACE WINDOWS.

For Square Head Open Sash or Windows Bent or Swell Face add to net price of Sash of same size or thickness, as follows: For sash or windows 3 ft. 4 in. wide or under if radius is 8 feet or less for single one-light sash $1.50 net; for two-light windows $3.00 net. For sash or windows wider than 3 ft. 4 in. and not wider than 6 ft. for single one-light sash add $2.00 net, and for two-light windows $4.00 net. If radius is greater than 8 ft. deduct 20 per cent from above figures.

TRANSOMS.

No. 97. For price of Open Sash, Windows, Transoms or Sash Extras, 2¼ inches thick, add to 1¾ inch open list	100%	Note C
For the same, glazed, add, of the open to the glazed list	133 1-3%	Note C

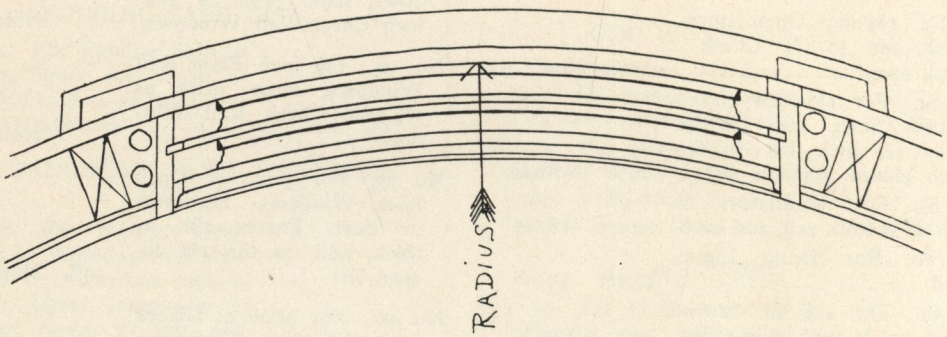

CIRCLE-FACE WINDOWS.

When ordering, give radius measured to outside of top sash, and say whether frames are made with square jambs like detail A, or radiating jambs like detail B.

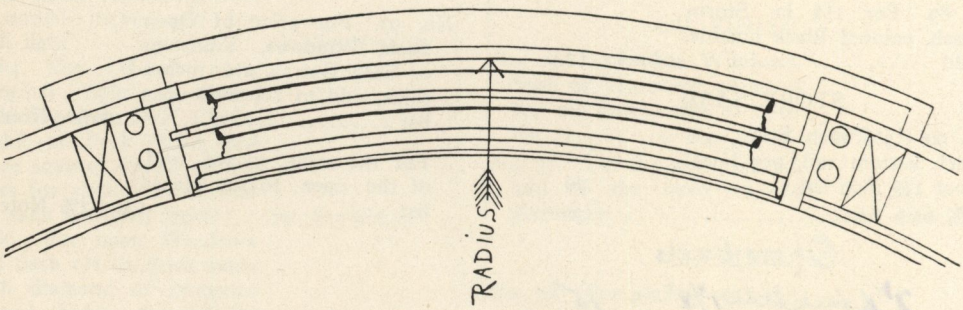

A full size paper pattern of sill sent will prevent errors.

If made like detail B give distance measured straight across between jambs from outside edges of the top sash.

DETAIL A.

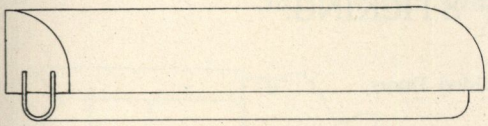

DETAIL B.

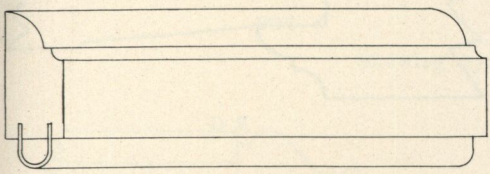

For Square Head Open Sash or Windows Bent or Swell Face add to net price of Sash of same size or thickness, as follows: For sash or windows 3 ft. 4 in. wide or under, if radius is 8 feet or less for single one light sash $1.50 net; for two-light windows $3.00 net. For sash or windows wider than 3 ft. 4 in. and not wider than 6 ft. for single one-light sash add $2.00 net, and for two-light windows $4.00 net. If radius is greater than 8 ft. deduct 20 per cent. from above figures.

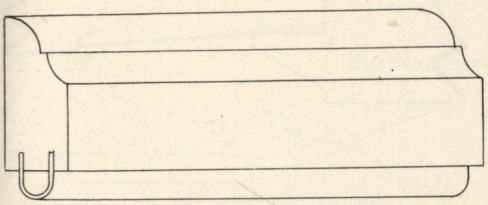

WEATHER STRIPS.

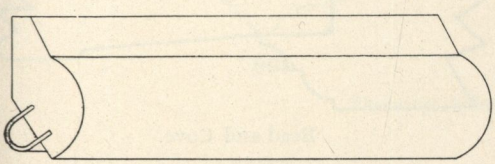

0—For the Upper Sash of Windows.
Price, per 100 lineal feet.....**$1.00**

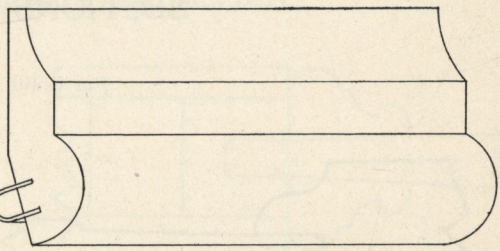

1—For the Lower Sash of Windows.
Price, per 100 lineal feet.....**$1.00**

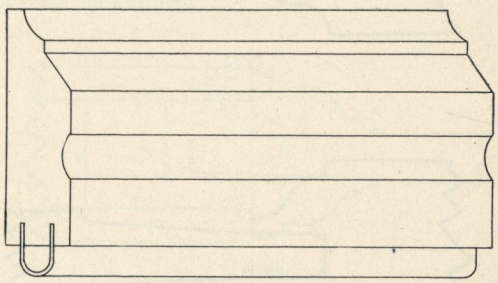

1½—For Sides and Tops of Doors.
Price, per 100 lineal feet.....**$1.45**

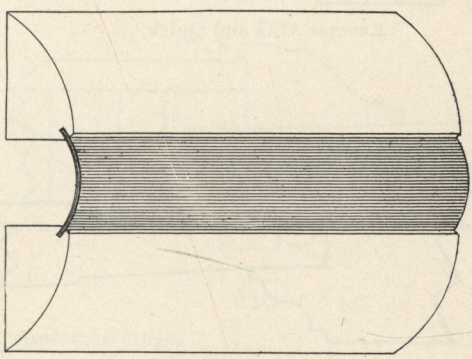

2—For the Center of Windows.
Price, per 100 lineal feet.....**$1.45**

3—For the Center of Double Doors.
Price, per 100 lineal feet.....**$1.60**

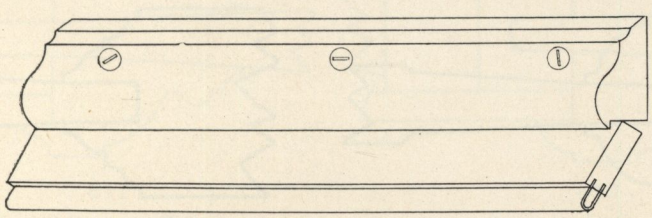

4—For Bottom of Light Doors.
Price, per 100 lineal feet.....**$1.75**

81—Rubber Threshold.

Made in lengths of 3 ft., 3 ft. 6 in., 4 ft. and 5 ft.
3 feet, $1.00 each; 3 feet 6 inches, $1.20 each;
4 feet, $1.30 each; 5 feet, $1.60 each.

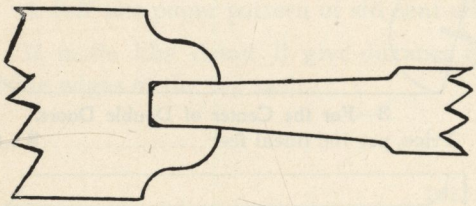

80—Spring Door Bottom.

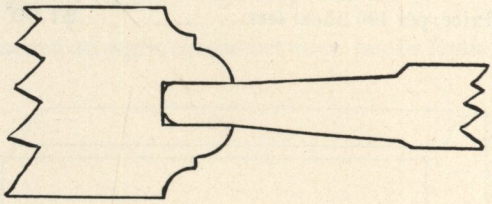

Two sizes, 2 feet 8 inches and 3 feet. Price per dozen.....**$6.50**

SPECIAL

Front Doors

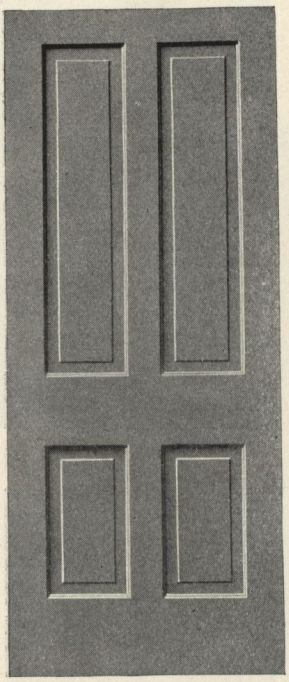

On pages 67 to 91 inclusive, we show our full line of Special Front Doors. We make a specialty of these front doors and manufacture them in large quantities, thus making it possible to sell them at the lowest prices.

Write for our large, free, 24-page Front Door Portfolio, showing pictures as well as delivered prices on all sizes. The pictures in our Front Door Specialty Book show the doors glazed with Portrait Lace, Battenberg Lace Curtain, Embossed Glass, also Bevel Plate and Double Strength Glass. All pictures are made direct from photographs of the doors and show them exactly as they are.

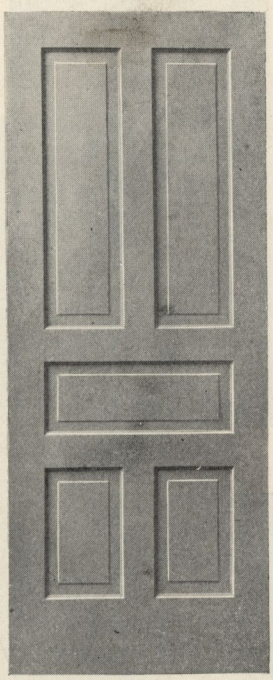

All our Front Doors are designed especially to meet the growing demand for a low priced cottage door. All carvings are genuine hand made wood carvings and not composition ornaments. The glass designs are our exclusive property and cannot be duplicated without our consent. We guarantee safe delivery, and workmanship to be the best.

PAINTED PANEL DOORS.

For Quality and Finish they have No Equal.

200—4-Panel Painted.

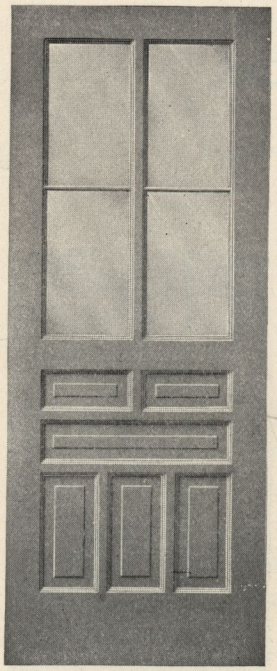

201—5-Panel Painted.

Our Painted Sash and Panel Doors are of superior grade. They are all manufactured from kiln-dried Lumber, the imperfections shellaced, and the Door covered with two heavy coats of light French gray paint, so that should it be necessary, they may be painted afterwards, either light or dark with the addition of but one coat of paint. The finish we put on them is called the "Egg Shell Finish" and we have received many compliments from the trade in general upon their fine appearance.

We manufacture these doors in the following sizes which we always have on hand and ready for prompt shipment.

2- 6 x 6- 6, 1⅛ inch and 1⅜ inch Thick.
2- 8 x 6- 8, " " " "
2-10 x 6-10, " " " "
3- 0 x 7- 0, " " " "

For delivered prices on painted doors, see our price folder.

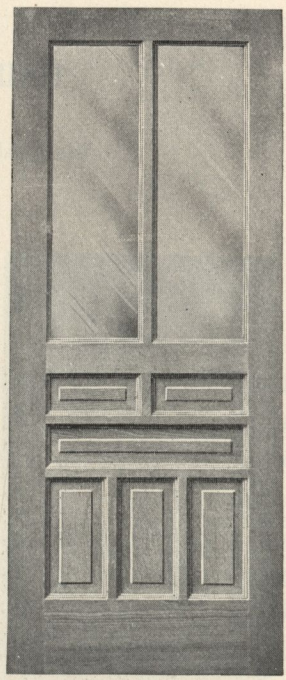

444—Good Luck.

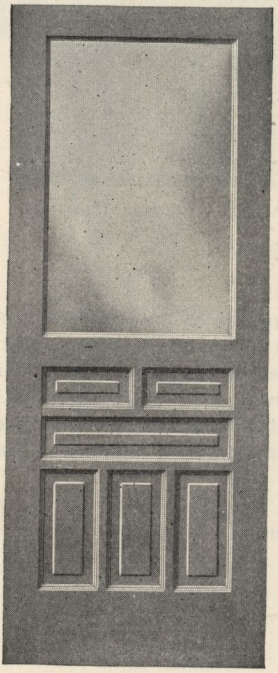

PAINTED SASH DOORS

GOOD LUCK SERIES

Bead and Cove Sticking to take the place of the old style 2 and 4 light sash doors which were O. G. sticking and 2 panels; notice panels.

222—Good Luck.

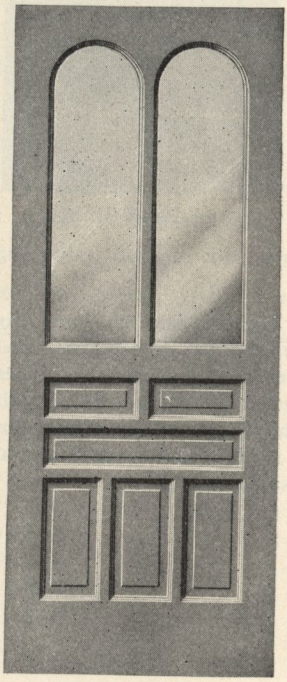

111—Good Luck.

GOOD AS WELL AS CHEAP DOORS

All of our *Good Luck* doors are made with Cove and Bead Sticking. This together with the modern six panel arrangement gives these doors the exact appearance of an expensive door; painted two heavy coats of light French gray paint, egg shell finish. These are the doors that made Radford famous

We manufacture these doors in the following sizes which we always have on hand ready for prompt shipment.

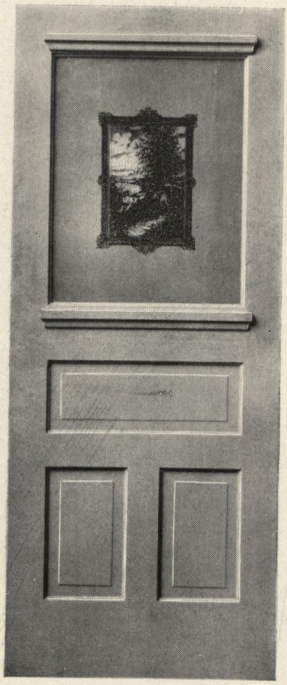

2- 6x6- 6, 1⅛, 1⅜ thick.
2- 8x6- 8, " " "
2-10x6-10, " " "
3- 0x7- 0, " " "

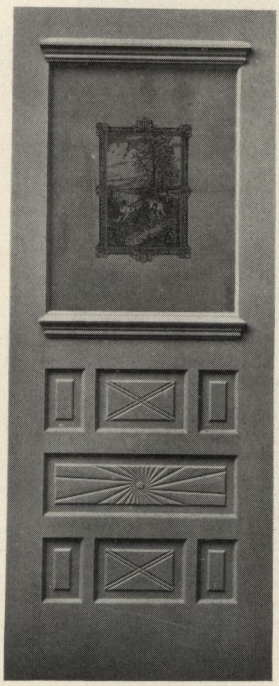

333—Good Luck.

For delivered prices on Painted Doors, write for special front door catalogue, free upon request.

PAINTED or GRAINED DOORS.

735—Common Sense.
Painted.

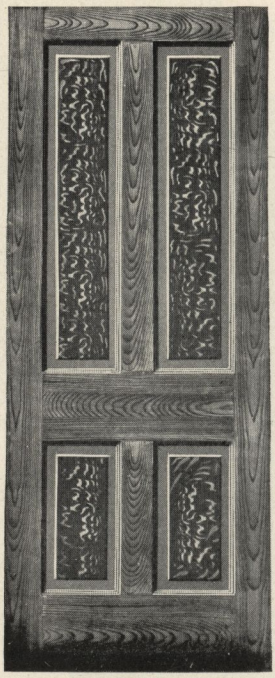

740—Teddy.
Painted.

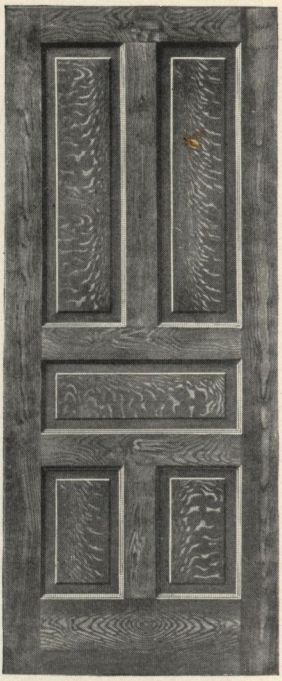

Our Common Sense and Teddy Doors are our superior Painted or Grained Doors with a Cap and sill, so as to give them a heavier appearance. For cheap dwellings they have taken the place of the No. 1 Front Door in many cases and for a side door they are becoming universally used.

GRAINED PANEL DOORS.

For Quality and Finish they have no Equal.

200—4-Panel Oak Grained.

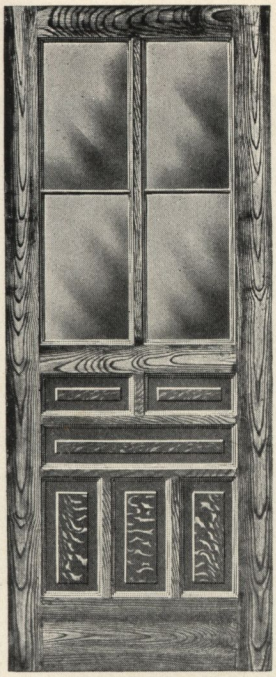

201—5-Panel Oak Grained.

Our Grained Doors are manufactured in the same manner as our Painted Doors with the exception that they are grained in imitation of Oak. The stiles and rails are grained to imitate Plain Sawed Oak, while the panels represent Quarter Sawed Oak. These Doors can be used very nicely in cheap dwellings where yellow pine finish is used, and are better than any other kind of a Door that could be put in their place.

We manufacture these doors in the following sizes which we always have on hand and ready for prompt shipment.

2- 6 x 6- 6, 1⅛ and 1⅜ inch thick.
2- 8 x 6- 8, " " "
2-10 x 6-10, " " "
3- 0 x 7- 0, " " "

For delivered prices on grained doors, see our price folder.

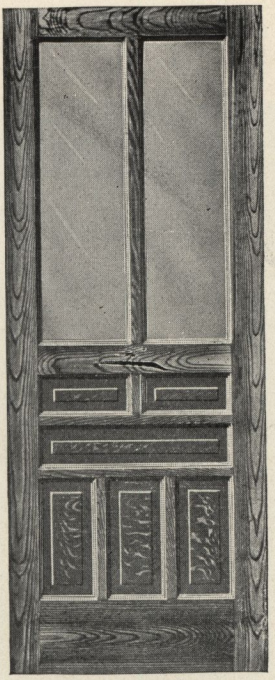

444—Good Luck.

GRAINED SASH DOORS

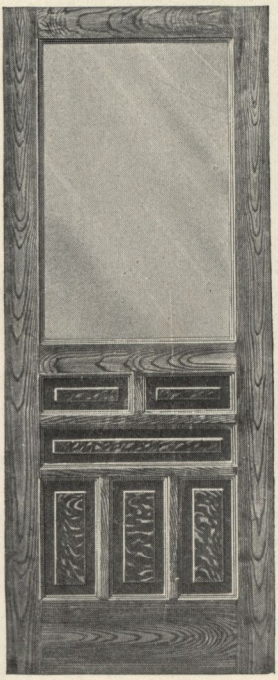

GOOD LUCK SERIES

All Doors are Hand Grained.

Bead and Cove Sticking, to take the place of the old style 2 and 4 light sash doors, which were O. G. sticking and 2 panels; notice panels.

222—Good Luck.

111—Good Luck.

GRAINED DOORS

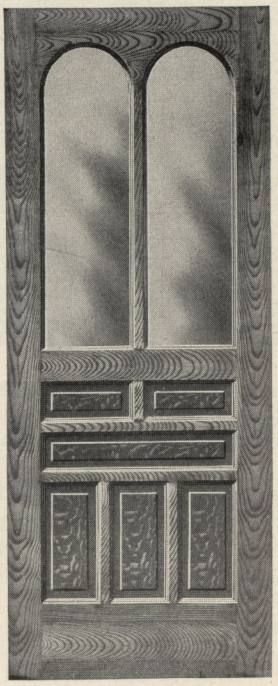

All doors priced on this page are the celebrated *Radford* grained doors, although we make them painted 10 cents less.

All doors are hand painted and resemble the finish of plain red oak, golden gloss finish.

All doors on this page are made with Cove and Bead Sticking. This together with the modern six panel arrangement gives these doors the exact appearance of an expensive flush moulded door.

We manufacture these doors in the following sizes, which we always have on hand and ready for prompt shipment:

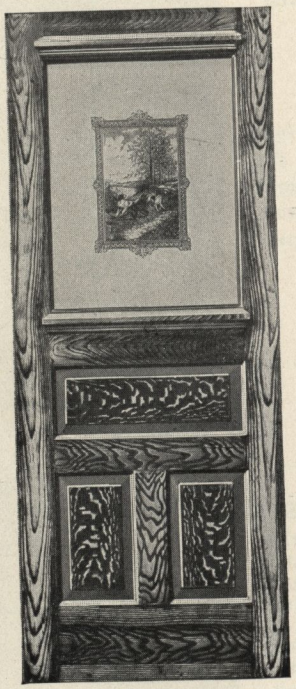

2- 6x6- 6, 1⅜ thick.
2- 8x6- 8, " "
2-10x6-10, " "
3- 0x7- 0, " "

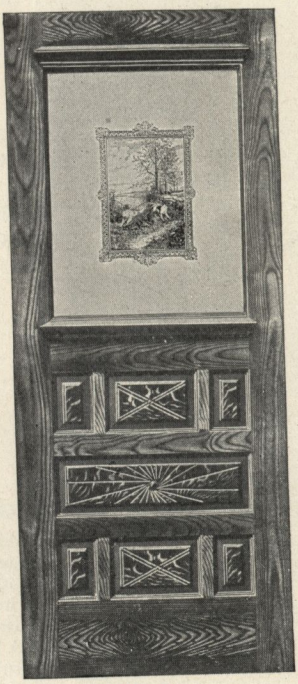

333—Good Luck.

For delivered prices on Grained Doors, write for our special Front Door Catalogue, containing delivered prices; it is free upon request.

PAINTED or GRAINED DOORS.

735—Common Sense.
Grained.

740—Teddy.
Grained.

Our Common Sense and Teddy Grained Doors are made in the same careful manner as our Painted Doors. All imperfections are shellaced and the doors are hand painted, (not dipped,) with two heavy coats of light French gray paint.

The panels are then grained in imitation of Quartered Oak and the stiles of Plain Oak. For rich, golden gloss finish they are unexcelled.

These doors are used for inexpensive dwellings and in many cases have taken the place of the No. 1 Front Door. They are universally used as a glass door for the rear as well as the side of the house.

Write for our Front Door price folder, showing low delivered prices.

STORM DOORS

Painted or Grained.

Solid Comfort—Painted or Grained.
GLASS STORM DOOR.

Storm King—Painted or Grained.
PANEL STORM DOOR.

They are made in the following sizes—Painted or Grained:

2- 6¾ x 6- 7, 1⅛ for 2- 6 x 6- 6 frame.
2- 8¾ x 6- 9, 1⅛ for 2- 8 x 6- 8 frame.
2-10¾ x 6-11, 1⅛ for 2-10 x 6-10 frame.
2- 8¾ x 7- 1, 1⅛ for 2- 8 x 7- 0 frame.
3- 0¾ x 7- 1, 1⅛ for 3- 0 x 7- 0 frame.

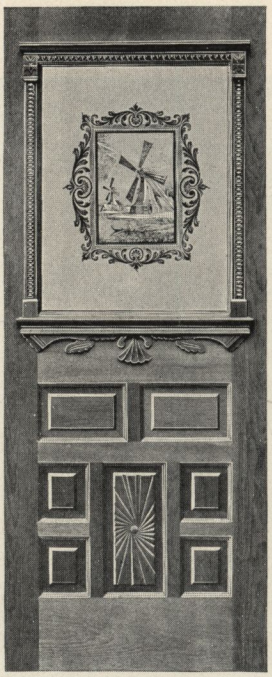

Other sizes, extra price.

These doors are very little higher priced than the regular 4 or 5 panel Painted or Grained Doors.

These doors are made ¾ in. wider and 1 inch longer than regular doors. We do this to allow for the offset of outside casing and pitch of sill, which will permit the Storm Door fitting in between outside casings.

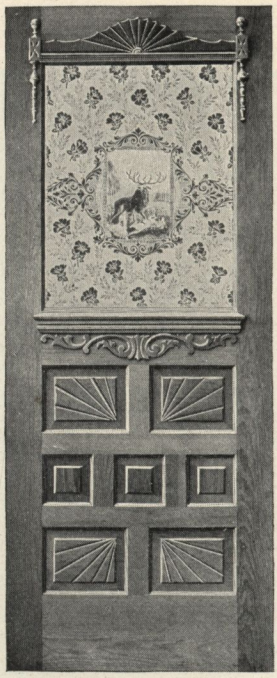

They are either Painted or Grained. All imperfections are shellaced and doors are hand painted (not dipped) with two heavy coats light French gray paint.

If they are wanted Grained, the panels are grained in imitation of quarter sawed oak and stiles of plain oak.

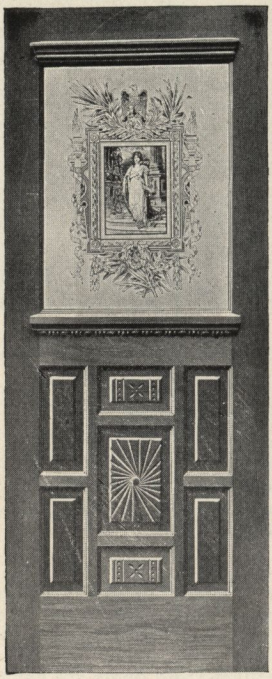

998—Wizard.

For 1⅜-inch rolling slat blinds in stock quantities deduct 20c list from 1⅜ stationary slat blinds. Size of blinds measure same as check rail windows, with the addition of 1 inch to bottom rail for sub-sill frame, which can be cut off if necessary. Our regular stock rolling slat blinds are made with O G stiles. We make square stiles on rolling slat blinds only on special orders. Stationary and half stationary blinds are made with square stiles.

For blind extras see page 129.

180
All Slats.

INSIDE BLINDS.

DIRECTIONS FOR ORDERING.

First—In all cases give the exact outside measure of Blinds wanted.

Second—Give the number of folds.

Third—State if Blinds are to be all slats, or half panels and half slats.

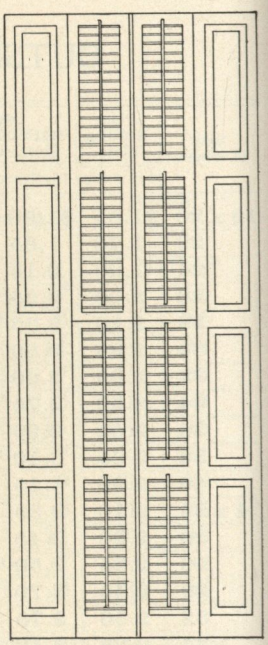

Fourth—State distance from top of window to center of meeting rail of sash, or where Blinds are to be cut.

Fifth—Give thickness of Blinds.

Sixth—If Blinds fold in pockets, give size of pockets.

Seventh—State if Blinds are to be painted or finished in oil.

Eighth—If for oil finish, extra price.

181
½ Panels, ½ Slats.

1⅛-inch thick all slats, all panels, or a combination of both.

	Per Lin. Ft.
2-fold, 2 feet wide and under	$1.00
3-fold, 2 feet 11 inches wide and under	1.25
4-fold, 2 feet 11 inches wide and under	1.50
4-fold, over 2 feet 11 inches and not over 3 feet 5 inches	1.75
5-fold, over 2 feet 11 inches and not over 3 feet 5 inches	2.00
6-fold, 3 feet 5 inches to 4 feet 5 inches, inclusive	2.50
8-fold, 4 feet 4 inches to 5 feet 5 inches, inclusive	3.00

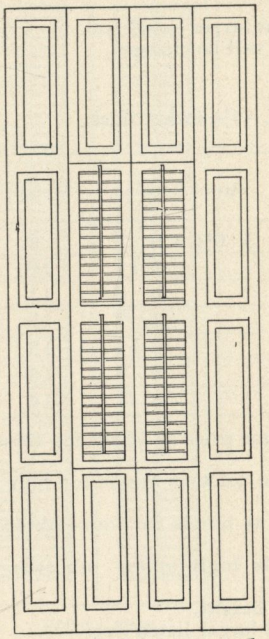

⅞-inch inside blinds 5 per cent less than 1⅛ inch.

The above prices are for White Pine.

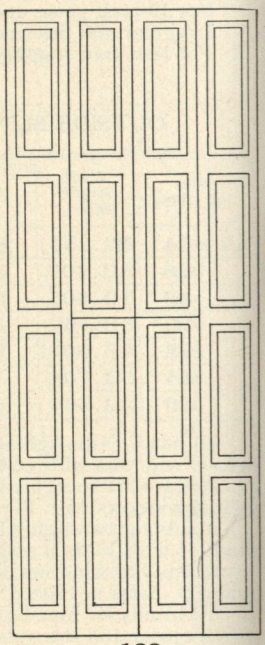

If for oil finish add 20 per cent to above prices.

If hardwood, such as Cherry, Ash, Maple, or Black Walnut are wanted, we charge extra price.

We make Inside Blinds that are not excelled, either in workmanship or style, in any market.

INSIDE SLIDING BLINDS.

Above section shows that no special frame is required to use our sliding blinds. The guideway is fastened on pulley stile, acting as a stop for the sash,

These sliding blinds are made ½-inch in thickness, and though constructed of light material possess great strength and lasting qualities.

Can be closed with the window raised and cannot blow open or rattle, thus giving the best medium of ventilation.

They do not interfere with curtains or window ornaments, and admit light and air from any part of the window.

These blinds are specially made to order in the white or finished complete; either varnished in the natural colors of the different woods or stained and varnished, or wood filled and cabinet or rubbed finish. All trimmings and hardware we furnish, which is included in the price of blinds given on page 131.

For combination of woods average the prices of the several woods.

Convex Blinds ..... $4.00 per window extra.
Gothic, Segment, Oval or Circle Tops ..... 2.00 " " "
Extra Heavy Lifts, Bronze or Old Copper (put on with screws) ..... 10 cents each.
Drop Pulls, Bronze or Old Copper ..... 15 " "
Concealed Metal Operator, per division ..... 12 " "

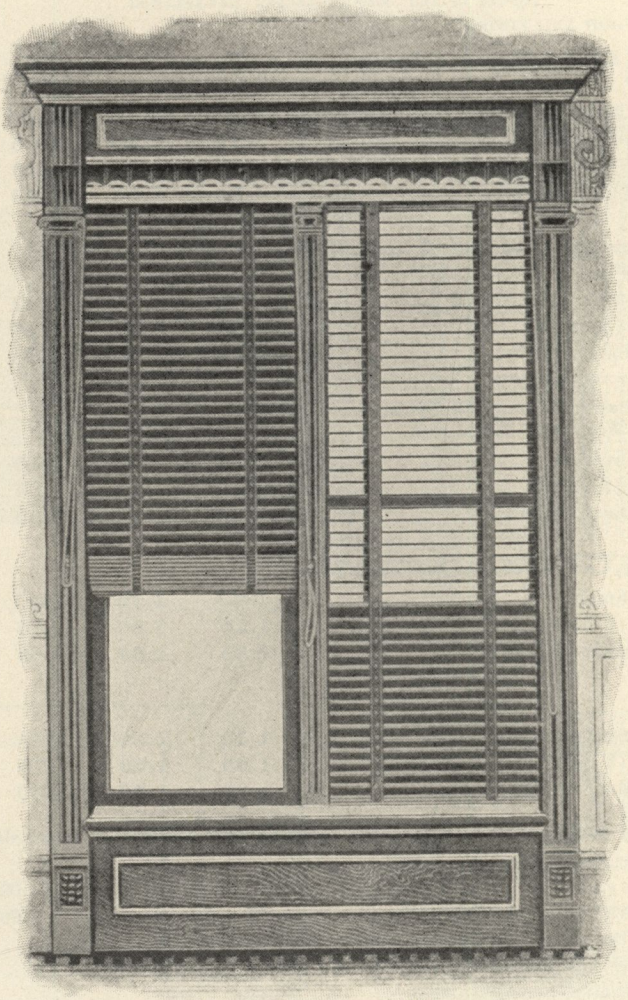

PLEASE NOTE—That above list prices include all necessary Hardware or Trimming, and in comparing cost with folding blinds or other makes of sliding blinds, this should be taken into consideration. **Above prices subject to discount.**

Will make net estimates on weighted blinds or on special designs from architects' details.

DIRECTIONS FOR ORDERING.

Give the exact measurement of the opening which the blinds are to fill. Where guideways take the place of stops, state distance from face of casing to inner face of lower sash. If windows are circle head or segment inside, send exact pattern or give radius. Full information for adjusting these blinds accompany each order.

VENETIAN BLINDS.

Above cut shows the blinds as used in a Double or Mullion Window.

In the left hand window the blind is partly raised, the slats being arranged to exclude the light. In the right hand window the blind is lowered, with upper slats arranged to admit light, and the lower ones to exclude it. In the blind each slat is independent in its action, consequently any number of slats can be closed or left open at will and in any desired part of the blind. The control of light and air is therefore practically absolute in these blinds.

Give opening size wanted filled.

LIST PRICES VENETIAN BLINDS

CLASSIFICATION OF WOODS.	Price per square foot. 2⅜ inch Slats.	2 inch Slats.
Spruce, Whitewood, Linden and Yellow Pine, finished natural, stained to imitate Hardwoods, or painted in dark colors	$0.19	$0.21
Painted in light colors or tints	.21	.23
Painted in enamels	.24	.26
Enameled, rubbed between coats	.38	.40
White Pine, Cypress, Plain Oak, Ash, Elm, Chestnut and ordinary Maple	.21	.23
Plain Birch and Butternut	.22	.24
Quartered Oak and Quartered Sycamore	.24	.26
Cherry, Black Walnut, California Redwood and White Ash	.30	.32
Red Mahogany, Curly Birch, Bird's Eye and White Maple	.38	.40

With the exception of Painted and Enameled work, the above prices are in Varnish Finish. Add to above list for ordinary Rubbed Finish 3 cents per square foot.

No Blind figured to contain less than 15 square feet.

Above prices subject to discount.

Our Venetian Blinds do not require any special frame, are easily applied, and are the most simply constructed on the market. Venetian Blinds do not interfere with curtains or draperies, and are becoming more popular every year.

SWINGING SALOON and CLOSET DOOR DESIGNS.

DOOR BLINDS.

Only carried in stock in pairs.

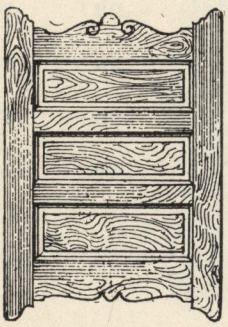

SIZE.					Thickness.	Price Per Pair.
2	6	x	6	6	1⅛	$3.95

These windows are suitable for the most costly or moderate priced residence and are very reasonable in price.

WASHINGTON FIR GUTTER.

Absolutely Clear Stock

Our V Gutters are made of Washington Fir of the following widths, 4 in 4½ and 5 inch. For size, measure across top of Gutter. This Gutter is recommended for use where cheap but durable Gutters are required. Washington Fir never warps, checks or splits, and we fully guarantee it. We carry same in 12, 14 and 16 feet lengths.

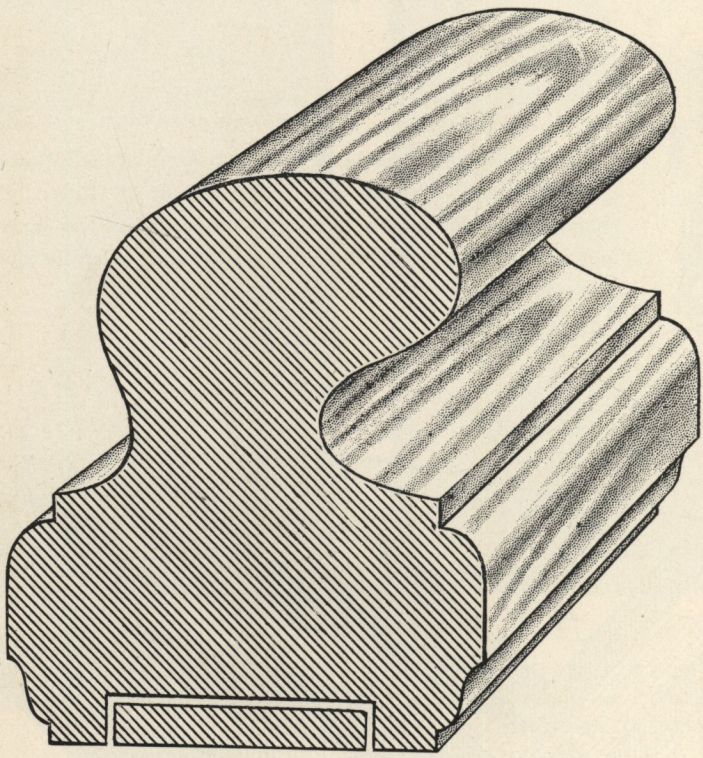

Prices: 4 inches $2.35 per 100 feet lineal.
" 4½ " 2.90 " " " "
" 5 " 3.55 " " " "

We carry in stock all the above sizes and can ship same day order is received.

OUR SPECIAL STAIR RAIL.

Carried in Stock in Oak and Yellow Pine.

33—Stock Pattern.

Size 2½ x 3½.

Yellow Pine, per foot.....18c
Oak, per foot 21c
Quartered Oak, per foot 24c

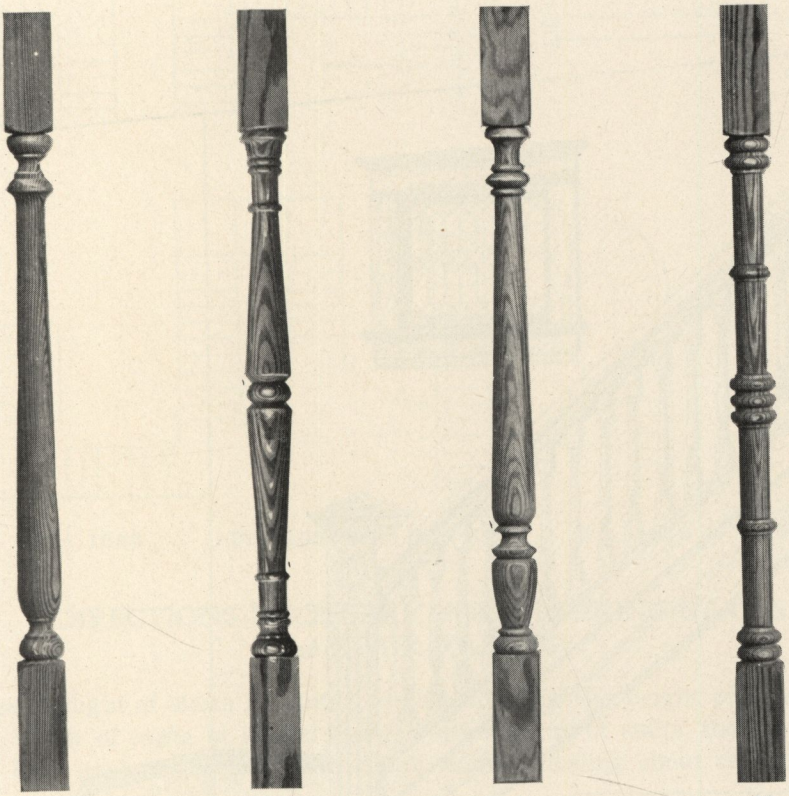

We furnish in lengths 8 to 16 feet.

We make all kinds of Stair Rail, shown in any catalogue as well as special designs shown on other pages in this book, at a slight additional cost over what we charge for above pattern. You will save time and some money by ordering our stock pattern No. 33 shown above, which we carry in stock in Oak and Yellow Pine, size 2½ x 3½.

We make this rail plowed for 1¾ balusters, or will furnish same without being rabbetted. Made from selected kiln-dried stock and hand smoothed; will not warp. We furnish loose fillet strip to cut between balusters, in order to make a nice finish job.

STAIR BALUSTERS.

Carried in Stock in Oak and Yellow Pine.

38 39 40 41

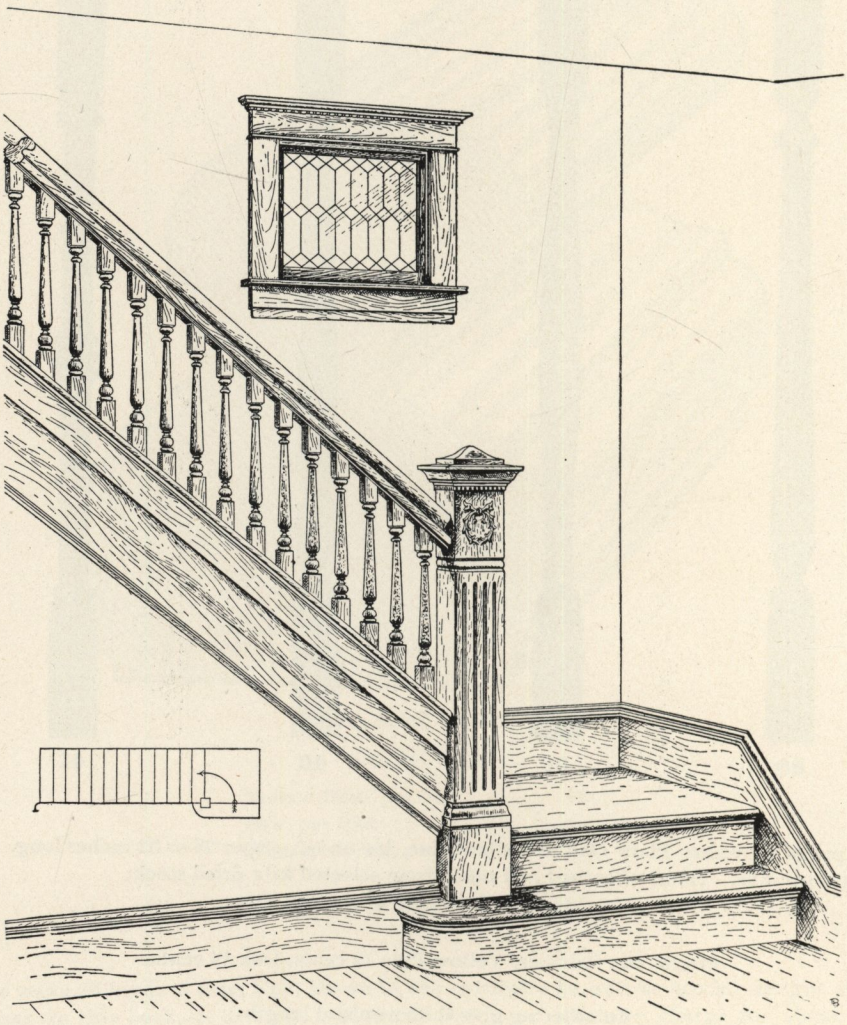

Note prices on either Plain Oak or Yellow Pine, 1⅜ or 1¼, either 28 or 32 inches long. Crated in lots of twenty-five. Hand smoothed and made from selected kiln dried stock.

Prices, any Baluster, Yellow Pine 12 cents, Oak 14 cents.

In ordering give thickness and length.

We make on short notice, all kinds of Stair Balusters shown in any catalogue, as well as our special Baluster designs shown on other pages in this book. You will save time and some money by ordering above stock designs, as we carry them in stock in both Oak and Yellow Pine, either 1⅜ or 1¼.

DIRECTIONS NECESSARY FOR ORDERING STAIRS and STAIR RAILING.

When a flight of stairs is wanted, we should know the height of story from floor to floor, width of joists in second story, width and run of stairs, the size of cylinder, style of base used in the hall, with rough sketch showing about the shape of stairs wanted.

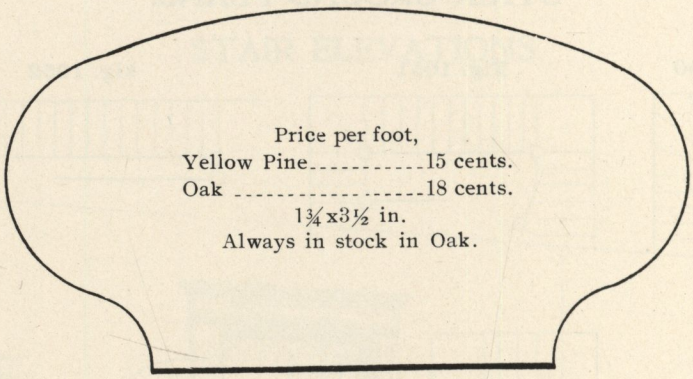

For STAIR RAILING—Straight Flight.

We require the width of rise and step as sawed out on string board, the number of risers, the size of cylinder from face to face of string or face board, which way it turns at head of stairs, and the number of feet of straight rail required at landing. Unless we receive plan showing otherwise, we always suppose the top riser for a straight flight of stairs to be placed at the edge or spring of cylinder.

For CIRCULAR or WINDING STAIRS.

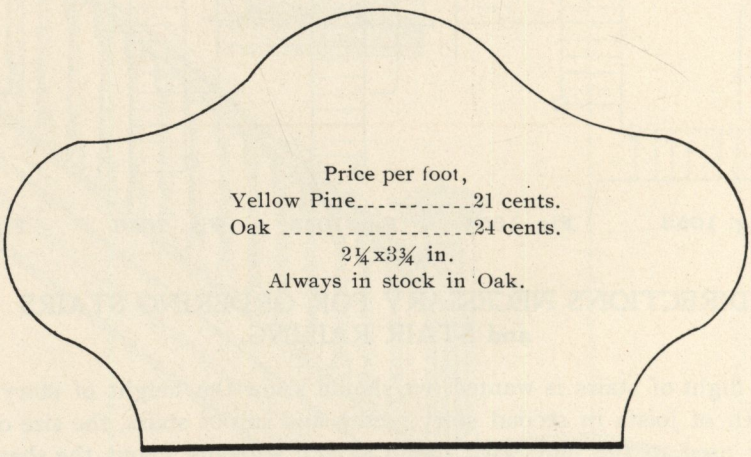

We should have an exact plan of stairs as built, giving the width of rise and step, the location of risers in cylinder, etc.; and, when there are straight steps below or above the cylinder, always give the distance from the first square riser to the edge or spring line of cylinder, on the face of string or face board. *Always write your address in full on the plans.*

OUTFITS.

Regarding Outfits—The following Outfits can be furnished with Mantels shown in this catalogue. You will find that each Mantel is priced with the various Outfits. In ordering please be sure and specify which outfit is wanted with each Mantel ordered.

Front View of No. 1366 Virginia Grate, Outfits No. 20 and No. 21.

OUTFIT No. 20 consists of

Fireplace — No. 1366 Virginia Grate, 30½ inches wide, 30¼ inches high, with 24-inch Fire Pot, 9 inches deep.

Facing — Best quality enameled tile (any color).

Hearth — 60 x 21 inches; best quality enameled tile (any color).

OUTFIT No. 21 consists of

Fireplace — No. 1366 Virginia Grate, 24½ inches wide, 30¼ inches high, with Fire Pot 20 inches wide, 9 inches deep.

Facing — Best quality enameled tile (any color).

Hearth — 60 x 21 inches; best quality enameled tile (any color).

Summer Grate can be furnished with Outfits No. 20 and No. 21, for $1.00 net extra.

VIRGINIA GRATE.

OUTFIT No. 22 consists of No. 1366 Frame and Summer Front only, as shown in Outfits 20 and 21. This is the Outfit to use for blind Mantels.

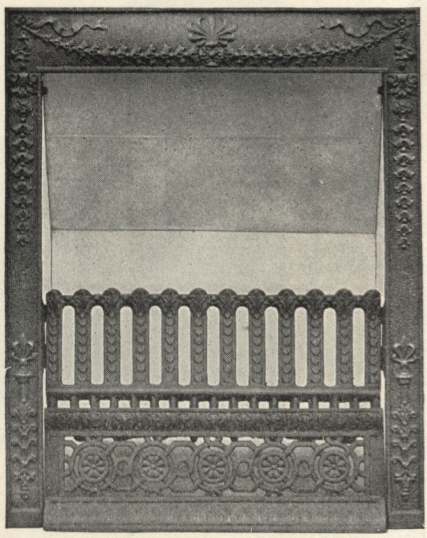

Facing — Best quality enameled tile (any color).

Hearth — 60 x 21 inches; Best quality enameled tile (any color).

DESCRIPTION OF VIRGINIA GRATE.

The No. 1366 Virginia grate which we show is undoubtedly one of the handsomest grates of its kind on the market.

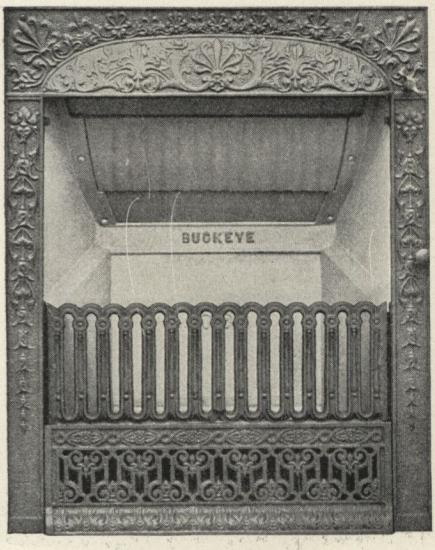

The basket is of heavy iron and hangs on the frame, and the fire brick should be built to fit snugly up to the basket. The basket is so made that it is very easy to poke out the ashes. The grate is suitable for burning hard coal, soft coal or wood.

Interior View of No. 1366 Virginia Grate, Outfits No. 21 and No. 22.
Showing how basket hangs on frame.

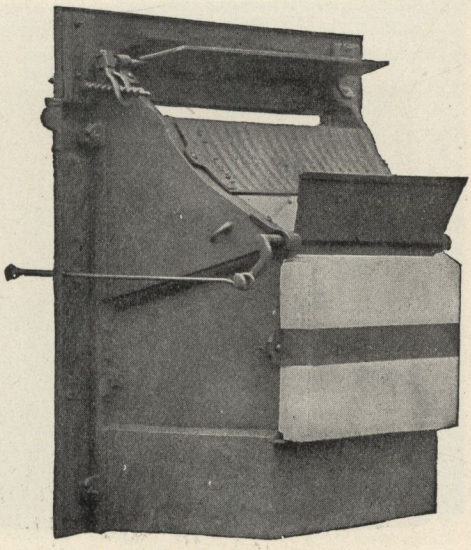

Regarding Fire Brick—Outfits No. 21 and No. 22 do not include fire brick, as same can usually be bought in your own town for less than the freight would amount to.

OUTFITS—*Continued.*

No. 1045. BUCKEYE GRATE.
Interior View — Outfits 23 and 24.

Outfit 23—30½ in. wide, 30¼ in. high; 24-in. Fire Pot, 12 in. deep.
Outfit 24—24½ in. wide, 30¼ in. high; 20-in. Fire Pot, 12 in. deep.

Side View.

Showing Damper Arrangement, Fire Tile, and General Construction of No. 1045 Buckeye Grate, Outfits 23 and 24.

Description of Buckeye Grates.

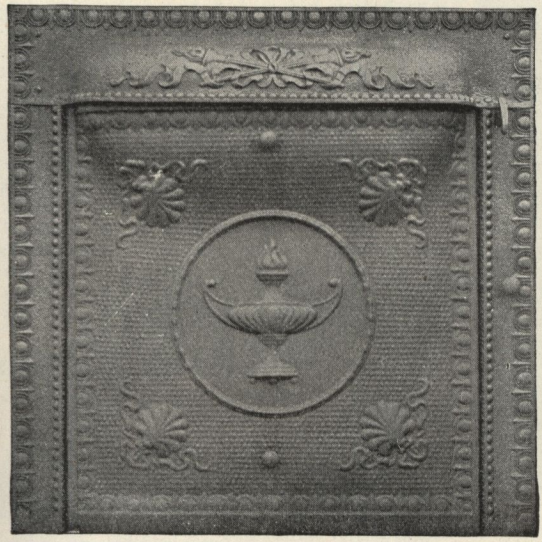

The Buckeye is undoubtedly the best medium-priced mounted grate on the market.

The body of the grate is cast iron, and is securely bolted to the frame. The sides are also cast iron, and contain an air chamber to insure greater durability.

The fire tile in the back is thick, and is securely attached to the body of grate. (See illustration of side view.)

Buckeye Grates are provided with a dumping bottom that will not clog, and insures the greatest results for the fuel consumed.

They are also provided with double dampers that are operated from the front of the frame. The upper damper is worked in a new manner by a screw and can be regulated to any width and there is no danger of falling, this greatly assists in the operation, and also insures perfect control of the fire.

No. 1045. BUCKEYE GRATE. Outfits 23 and 24
Front View—Showing Summer Front in position

OUTFIT 23 consists of

Fireplace — No. 1045 Plated Buckeye Grate, 30½ in. wide, 30¼ in. high; with 24-in. Fire Pot, 12 in. deep, with summer front.

Facing — Best quality enameled tile (any color).

Hearth—60x21 in.; best quality enameled tile (any color).

OUTFIT 24 consists of

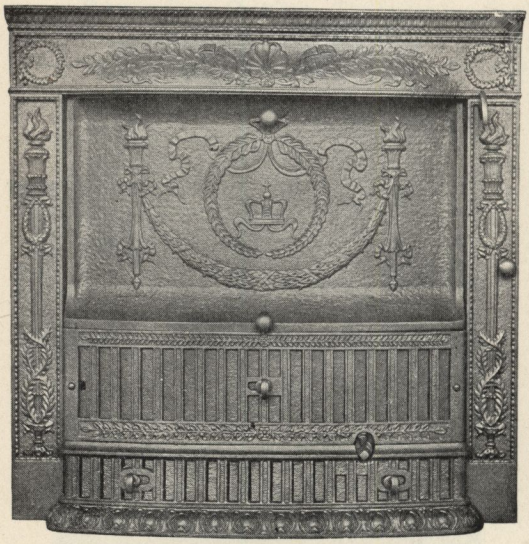

Fireplace—No. 1045 Buckeye Grate, 24½ in. wide, 30¼ in. high; with 20-in. Fire Pot, 12 in. deep, with summer front.

Facing — Best quality enameled tile (any color).

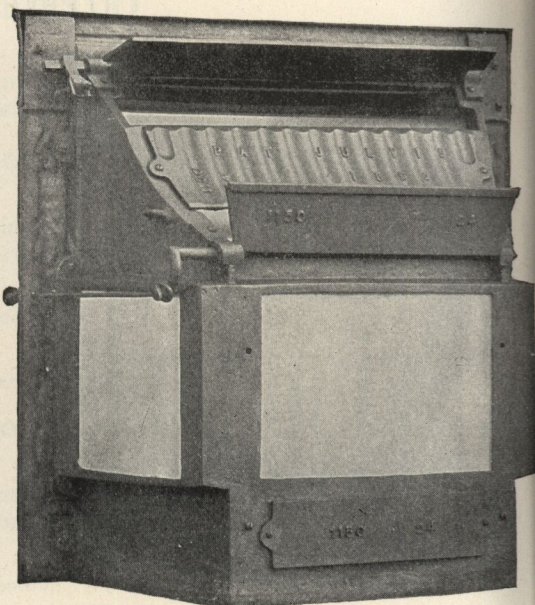

Hearth—60x21 in.; best quality enameled tile (any color).

For Front and Side view of Outfits Nos. 23 and 24 see above.

OUTFITS—*Continued.*

Front View No. 1116 Plated Monarch Grate, with summer front in position.

Rear view of No 1116 Monarch Grate Outfit No. 25, showing damper arrangement.

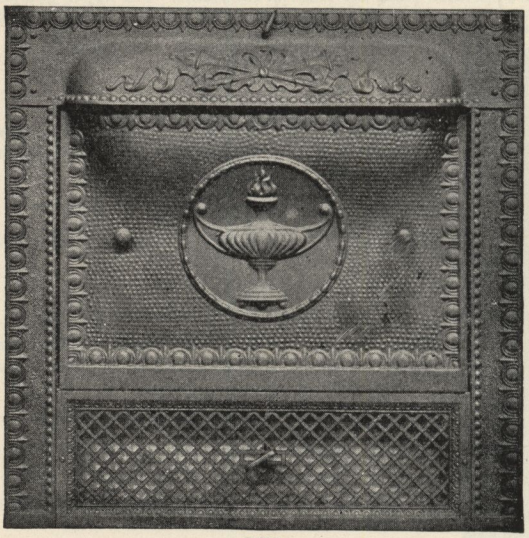

OUTFIT No. 25 consists of

Fireplace—No. 1116 Plated Monarch Grate, 24½ inches wide, 30¼ inches high. Firepot 20 inches wide, 12 inches deep.

Outfit No. 25 can also be had 30½ x 30¼ inches, with 24 inch firepot, 12 inches deep for $1.50 net extra.

DESCRIPTION OF MONARCH GRATES.

The merits of the Monarch Grate, are so well known that it is not necessary for us to dwell long upon a description of them. They are made like a stove complete, all in one piece. bolted securely together and they do not require the services of a skilled mason to set them, as it is only necessary to push them into the fireplace and they are ready for use. The fire pot in the Monarch is lined with fire clay lining in the back and sides. These grates have a curved top which reflects the heat into the room. They are supplied with double dampers which are operated from the front with knobs (See illustration above). The upper damper is worked in a new manner by a screw and can be regulated any width, and there is no danger of falling. The screw and arm are made of malleable iron. The Monarch Grate is suitable for either hard or soft coal, coke or wood.

975

GAS GRATE with Summer Front in place.

30½x30¼ and 24½x30¼; five-row steel burner; deep or shallow back.

OUTFIT No. 26 consists of

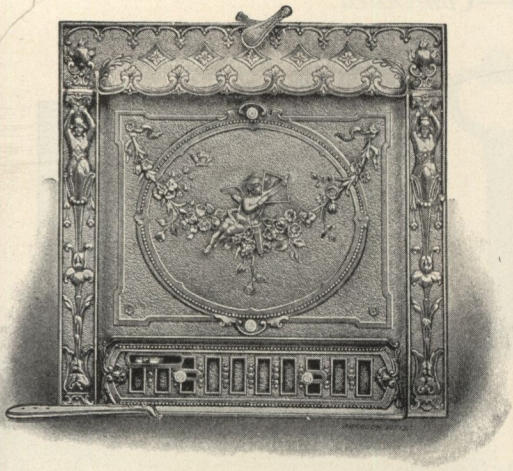

Fireplace—No. 975 complete mounted Gas Grate and Summer Front, plated; 24½ inches wide, 30¼ inches high, or 30½ inches wide, 30¼ inches high. This grate has copper reflecting sides and base; made with five-row steel burner; double hood; damper full width of back; operated by handle on top of grate. Has double ventilating back, which takes cold and foul air from the floor, and passes through opening in back of chimney.

Facing—Best quality plain enameled tile.

Hearth—60x21 inches. Best quality plain enameled tile.

With fifteen feet of gas per hour you can keep a room fourteen feet square to a temperature of seventy degrees when the thermometer stands at twenty above zero. It will never burn out. It makes a good ventilator. It burns absolutely odorless. In ordering state whether natural or artificial gas will be used.

OUTFITS—*Continued.*

488. NEW COLUMBIAN GRATE (Louis XIV design). 30½ inches wide, 30¼ inches high; 24-inch plated basket with shaking and dumping bottom.

OUTFIT No. 27 consists of

Fireplace.—No. 488 Plated New Columbian Grate, 30½ inches wide, 30¼ inches high, with 24-inch plated basket and plated summer front.

Facing.—Best quality enameled tile (any color).

Hearth.—60x21 inches; best quality enameled tile (any color).

Outfit No. 27 can also be had 24½ inches wide, 30¼ inches high, with fire pot 20 inches wide for $1.50 net less.

NOTE.—Read carefully full description of New Columbian Grates on page 272.

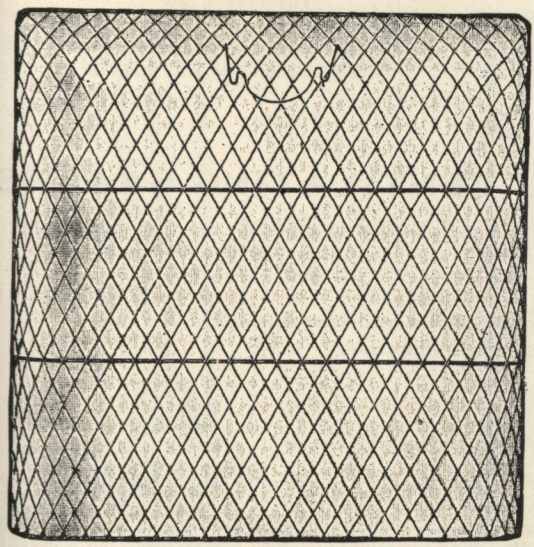

SPARK GUARDS.

Our No. 1 and 2 Spark Guards as here shown are designed to answer every purpose for which they are intended. As a protection from falling sparks they are guaranteed, the fine wire cloth with which they are lined practically preventing any sparks from coming through. As a preventative to keep small children from falling into the fire, an article of this kind is invaluable, as it stands solid on the hearth and absolutely covers any fire place up to 31 x 31 inches, the exact size of guard. The value of first feature mentioned will at once be apparent, when one considers the danger to life and property from the many fires originating from just such causes as a spark falling from open grate or fire place. A very small spark quite often does the damage.

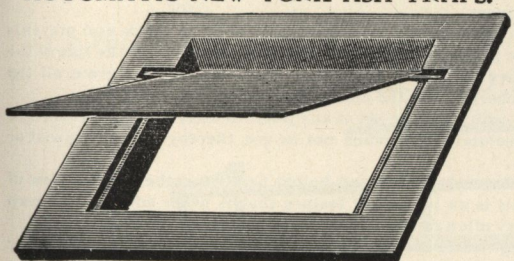

DESCRIPTION.—Made of the best coppered steel wire and full lined with finely woven bright wire cloth. Not like the ordinary unlined black wire guard seen in your hardware store, but a very pretty and ornamental piece of fire place furniture.

No. 1 Coppered Fine Wire Lining 24 inches wide, 30 inches high, List $2 00

No. 2 Coppered Fine Wire Lining 30 inches wide, 30 inches high, List 3.00

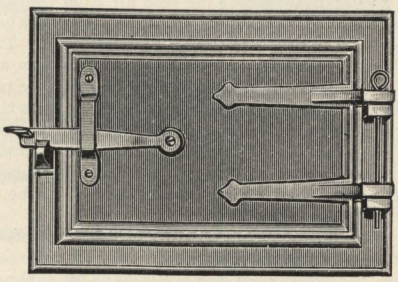

AUTOMATIC NEW YORK ASH TRAPS.

IMPROVED COLUMBIAN VENTILATING GRATE

Showing Damper Arrangement, Fire Tile and General Construction of Nos. 1 and 2 Improved Columbian Ventilating Grates.

Interior View

IMPROVED COLUMBIAN VENTILATING GRATE

IMPROVED COLUMBIAN VENTILATING GRATES

For Hard Coal, Soft Coal, Coke or Wood

Nothing but the Very Best Materials and Workmanship enter into their construction

---

WHAT THEY WILL DO

The Damper system, as applied to the Improved Columbian Ventilating Grates, gives the user absolute control of the fire, thereby providing an easy way to increase or lessen the heat as required. This is an important feature that can not be accomplished in any other make of grates; we except none. It also affords an excellent system of ventilation, as well as collecting the cold air from the floor and carrying the same into the air chamber back of the fire tile, where it becomes superheated and passes above the line of fire, producing perfect combustion of the gases which otherwise would escape into the flue unconsumed. This consumption of the gases adds very materially to the heating qualities as well as to the economy, cheerfulness, and cleanliness.

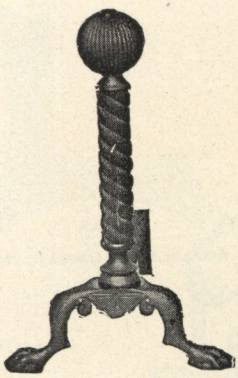

We would call your special attention to the position occupied by the top tile, which acts as a check and prevents the heat from passing direct into the flue. It also insures the passing of the superheated air directly over the line of the fire, producing greater benefit for the fuel consumed. By opening the lower damper when shaking the grate, all the dust is drawn into the chamber back of the fire and then discharged into the main flue.

The upper damper is controlled by regulating device, which can be set at any point to meet the requirements of the flue to which the grate is attached. It can be closed absolutely tight when not in use, thereby preventing soot or other dirt from entering the room.

The Improved Columbian Ventilating Grates are constructed in parts and bolted firmly together, with a view of providing for the necessary expansion and contraction. This is an important feature that is never adopted in cheap grates, and where provision is not made for expansion, it very often causes the displacement of the tile facing.

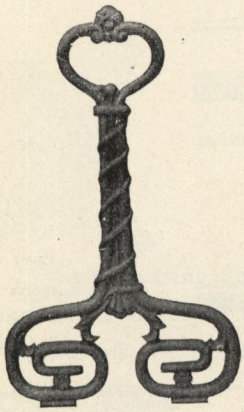

All linings used in the Improved Columbian Ventilating Grates are made with a view of great durability; they are carefully set in asbestos cement, which insures an absolutely tight fire chamber. Special provision is also made for the easy and convenient replacing of the tile lining when required.

Explanation and Instructions for Composition Capitals.

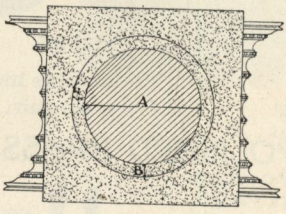

PLAN

ANGVLAR ABACVS COLVMN.

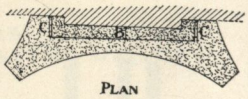

PLAN

ANGVLAR ABACVS. CORNER PILASTER.

PLAN

SQVARE ABACVS. COLVMN.

PLAN

ANGVLAR ABACVS. PILASTER.

The above plate illustrates one of our modern Ionic Capitals with necking (Empire), as applied to a column showing the wood shaft and core running through the Capital supporting the entablature above. The plans of the different abacus forms as given will serve as a further illustration of the relative position of shaft and our material.

"A" indicates the core or extended shaft running through Capital.

"B" shows thickness of our material.

"C" indicates the return of Pilaster Capital; which always must be mentioned in ordering Pilaster Capitals.

All our Capitals are furnished as shown in the Catalogue, each Capital having a complete finish to connect with shaft. The diameter given in Catalogue represents the top of Column. The width represents the top of Pilaster. The height given is the exact height of Capital. Always allow a trifle more height for your core so the weight will rest on shaft and not on Capital, ⅛ of an inch up to a 10-inch diameter; ¼ of an inch above that size will be sufficient to insure a safe application.

The thickness of our material is one inch up to a 10-inch diameter Capital, making the core of a 10-inch diameter Capital 8 inches, of an 8-inch Capital 6 inches. Above 10 inches allow ⅛ of an inch more for the thickness of material for every two inches of increased size, making core for a 14-inch diameter Capital 11½ inches, a 16-inch Capital 13¼ inches, etc.

In ordering Capital, give name, number and size of diameter or width; also state material wanted, viz: whether Exterior Composition, warranted to stand in any climate, or Interior Composition, made with grain to match any wood; (Interior Composition having a solid wood body requires no core on Column. Always state the kind of wood and finish.)

The sizes of our brackets given are:

1st The entire width across abacus moulding.
2d Width of face on body.
3d Drop or length.
4th Projection.

Composition Capitals and Brackets

The increasing demand for Capitals, both Column and Pilaster in composition instead of wood warrants us, we believe, in making this class of work a feature of our new catalogue. We show on the following pages a number of designs in different styles of architecture suitable for either inside or outside use. And we also include a large and varied list of the sizes in which they can be furnished. We recommend them as follows:

In beauty they easily surpass wood carvings, the detail in execution being brought to a fineness impossible in wood

In durability they are the equal of wood, and for outside use they are specially prepared and guaranteed to stand any conditions of climate.

In cost they are very much cheaper than wood.

Write us for prices or any desired information.

We can furnish these Capitals with our Colonial Columns. When ordering always give diameter of neck of column.

CHINA CLOSETS.

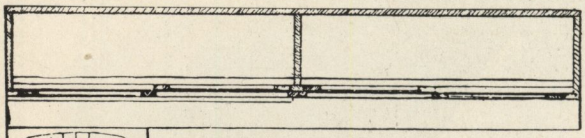

1313

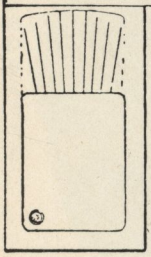

1314

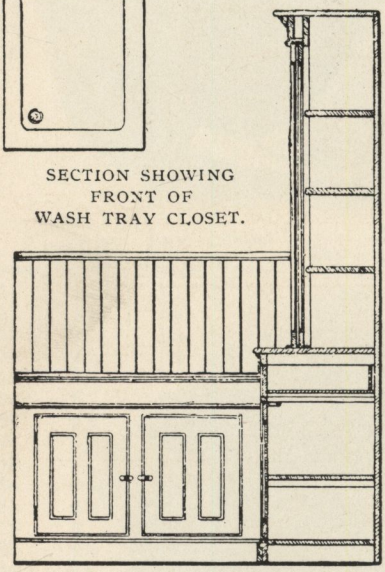

In writing for price give opening to fill and depth of shelves. Also state if open or glazed doors.

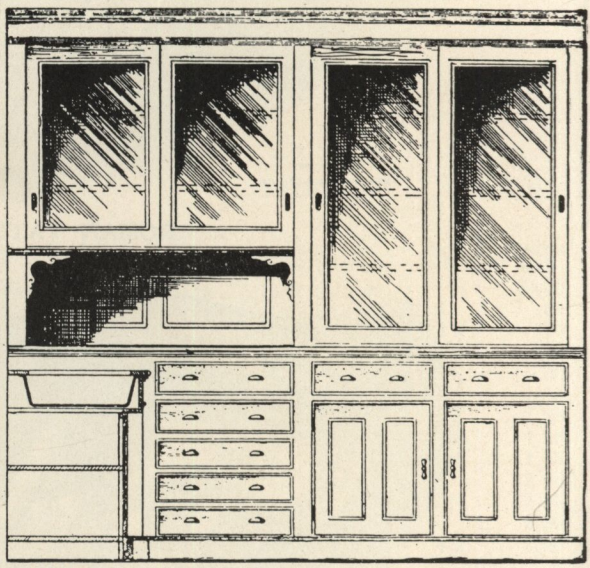

GROUND PLAN OF CHINA CLOSET FINISH.

SECTION SHOWING FRONT OF WASH TRAY CLOSET.

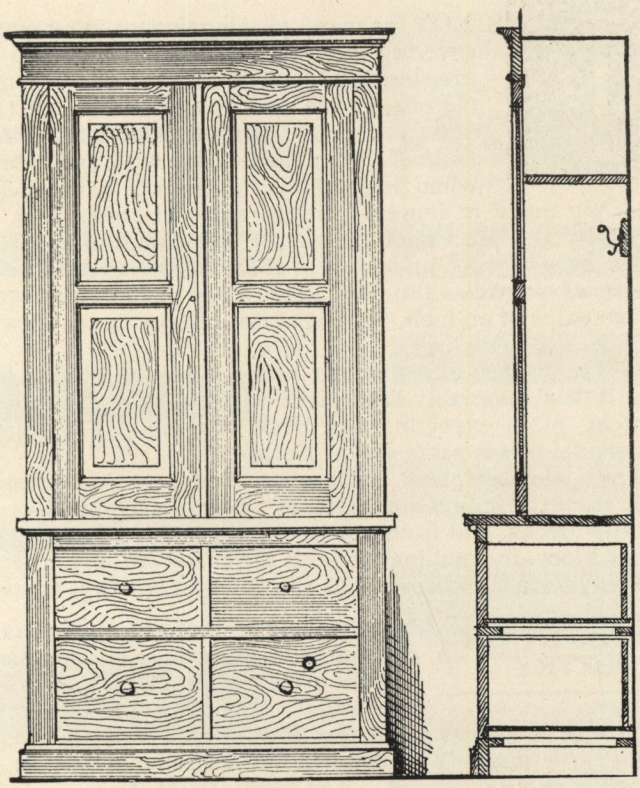

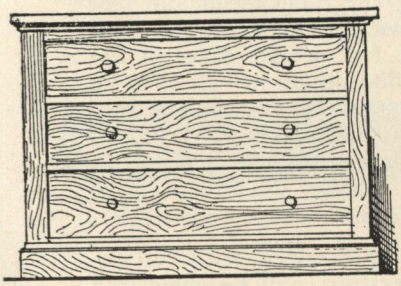

1315

In asking price give size of opening to fill, depth of shelves, style of glazing and kind of wood. We make cases of drawers and wardrobes of all kinds. Write for estimates.

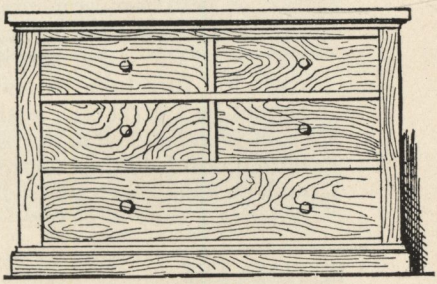

WARDROBE and SETS of DRAWERS.

5007

5008

5009

We make special prices on above line of work, gotten out in Pine or any of the Hardwoods.

WOOD CARPET and PARQUET FLOORING

S NOT, as many people suppose, a temporary floor covering to be laid down and taken up at pleasure, but is a permanent new floor on top of the old one, and is carefully fitted into all the offsets and runs around all the projections of the room, and is firmly nailed down with small brads; and when finished has the effect of a thick European floor. We make it, however, in the same elaborate and beautiful designs, by the process of gluing the wood on cloth instead of to another piece of wood an inch or so thick, and we make it at a much less cost, as we utilize the floor already down, and thus occupy but five-sixteenths of an inch, instead of one inch or more (as with thick parquet).

Where disappointments have arisen from any kind of hardwood floors, it has invariably been from not understanding the proper treatment, or in expecting too much of them. The treatment of floors should be the same as the European.

The common remark "that a bare floor is so cheerless" comes wholly from the impression given by an ordinary pine floor, with its unsightly cracks, and from not having seen the effect of a well-laid Parquet Floor, in combination with the furniture and other articles, in keeping with the character of the room in which it is laid.

WOOD CARPET and PARQUETRY

Is made in the uniform thickness of five-sixteenths of an inch. The woods used are all kiln dried and prepared so as to prevent shrinkage Care must be taken to preserve them from dampness until the floor is laid and finished. The straight carpeting, 36 and 28 inches wide, rolls up like an oilcloth, and is thus readily shipped. The borders and strips are twelve feet long, and the Parquet Flooring comes in sheets 2x6 feet, and make a solid package for shipping.

RUGS

Are being extensively used, on account of their healthfulness and convenience in keeping the room clean and free from dust. They are generally used on the middle part of the room, leaving a margin of about two feet around sides of the room for furniture to stand on. The floor upon which they lie should be a good one, with some degree of ornamentation, and free from joints and cracks. The dust on the floor is easily removed with a damp cloth or brush, and the rug can be rolled up at pleasure, and be taken out to be freed from dust. Rugs are now made to order at a very moderate cost, and of any desired shape and size.

ESTIMATES

Free of charge for floors or borders, with full instructions and working drawing, will be cheerfully given to parties sending us a sketch of the ground plan, with measurements of the space desired to be covered. State what class of room it is for, also if a cheap or ornamented floor is desired. Our floors vary from $1.25 to $18.00 per yard. It is better to say how expensive a floor is desired, and the design will be made in accordance.

PARQUET FLOORS

Consists of strips and blocks of hardwood fastened together at edges and on backs, in slabs of convenient size for laying. They are made a solid part of the floor by being nailed down to the under floor. They are then finished with Wax or Parquet-lac, so as to heighten the natural beauty of the wood.

They are made beautiful by the contrasting color of the different woods employed, and the weaving effects produced by changing the direction of the grain in the perfectly made joints.

They have been made after this method in Europe for centuries and are no experiment.

They are established here, and have come to stay.

To those interested we will mail small sample, so that they may understand the work we offer.

All prices named are for goods $\frac{5}{16}$-inch thick, uncut and measured before laid. Prices for any design in $\frac{7}{8}$-inch thick will be given on application.

We make no charge for plans or estimates furnished, if returned to us. Mail us outlines and measurements of such rooms, which you may have to cover.

POLISHED PLATE GLASS

ODD and fractional parts of inches are charged at the price of the next highest even number. Irregular shaped glass, or glass cut to pattern, will be charged as it squares. No special thickness guaranteed; but when heavy plate is required, and so ordered, care will be exercised in selecting the heaviest in stock at the time.

Discounts apply to "glazing quality" only, and to glass of ordinary thickness. Selected glass and special thickness charged at special prices.

Glass exceeding the sizes comprised in the tables will be furnished at special prices.

On all orders amounting to less than $100 net, or for less than three plates of whatever value, boxing will be charged at the rate of 8 cents per square foot, lid measurement. Said measurement to be six inches larger each way than the widest and longest plates in the case.

To Approximate Weight of Polished Plate Glass Boxed.

Extend the glass at 3½ lbs. per square foot. Weight of box equals the contents of a plate of greatest width and length of those packed therein multiplied by 10.

Thus:

1 plate 36″ x 96″ } =59 ft. x 3½ ..... 206½ lbs.
1 plate 60″ x 84″ }
Size of box 60″ x 96″=40 ft. x 10 ..... 400 "

606½ "

POLISHED PLATE GLASS.

OFFICIAL BENDING LIST.

(Adopted March 1st, 1900.)

PLATE AND WINDOW GLASS, NOT EXCEEDING QUARTER CIRCLE.

PLATE GLASS.

	Sq. ft.
Plates where length and width added are less than 76 in. say 34x40	$0.60
Plate of 76 in. or more, but less than 90 united in	.75
" 90 " " " " 100 " "	1 00
" 100 " " " " 110 " "	1.50
" 110 " " " " 120 " "	2.00
" 120 " " " " 140 " "	2.50

	Sq. ft.
Plates of 140 in. or more, but less than 160 united in	$3.00
" 160 " " " " 180 " "	3.50
" 180 " " " " 200 " "	4.00
" 200 " " " " 210 " "	4.50
" 210 " " " " 220 " "	5 00
" 220 " " " " 230 " "	5 50
" 230 " " " " 240 " "	6.00

Minimum charge for bending plate is $1.00, irrespective of size.

WINDOW GLASS.

	Sq. ft.
Lights of less than 60 united in	$0.25
" 60 in. or more, but less than 70 united in	30
" 70 " " " " 80 " "	.40

	Sq. ft.
Lights of 80 in. or more, but less than 90 united in	$0.50
" 90 " " " " 100 " "	.60
" 100 " " " " 110 " "	.90

Minimum charge for bending light is 50c, irrespective of size.

Beveled glass, 25 per cent additional and at owner's risk.

Bending on the length where it exceeds the width by more than 6 in., 25 per cent additional.

Odd or fractional parts of inches charged as even inches of next larger size. Sizes containing less than one square foot will be charged as a full foot, and in narrow widths no size will be figured as less than 12 inches wide.

Above prices are for bending only. Boxing extra.

IMPORTANT NOTICE.

When moulding is priced by the inch ***it is in all cases understood*** that the price is based on ripping width of lumber, that is: ¼ ***of an inch wider than the finished size*** of moulding. For example: A ⅞ inch thick panel moulding if made to finish 1¾ inches wide would be charged as 2 inches (being ripping size); to finish full 2 inches, would be charged as 2¼ inches, etc.

Approximate weight of Mouldings, 1x1 inch, per 100 lineal feet, 15 pounds.
